WELCOME TO THE FUTURE OF THE PROMOTIONAL PRODUCT

People & Planet Protection
we adapt to new times

UNE COLLECTION DE PRODUITS INNOVANTS ADAPTÉS À LA NOUVELLE RÉALITÉ
A COLLECTION OF INNOVATIVE PRODUCTS ADAPTED TO THE NEW REALITY

LA DURABILITÉ ET LA CONSCIENCE ÉCOLOGIQUE, APPLIQUÉS DANS UN NOUVEAU CONCEPT D'OBJET PUBLICITAIRE

Oui, nous nous impliquons au changement, à la consommation durable et au mode de vie respectueux de l'environnement. Nous parions sur le **concept 3R: Recycler, Réutiliser et Réduire.**

SUSTAINABILITY AND ECOLOGICAL AWARENESS, APPLIED TO A NEW CONCEPT OF THE PROMOTIONAL GIFT

Yes, we join the change, sustainable consumption and environmentally friendly lifestyle. We are committed to the **3R concept: Recycle, Reuse and Reduce.**

NEW TIMES, NEW MATERIALS

ANTIBACTÉRIEN

Matériau antibactérien spécialement traité pour inhiber et prévenir la croissance bactérienne, en raison de l'incorporation d'agents microbiens statiques permanents, qui sont très efficacés dans la lutte contre la contamination bactérienne.

CIMENT DE PIERRE DE CRAI

Ciment de pierre de craie est un conglomérat formé par le mélange de matériaux naturels, principalement le calcaire moulu et l'eau, résultant en un matériau d'une grande cohérence et durabilité.

RPET / PET RECYCLÉ

Le rPET ou PET recyclé est un matériel fabriqué à partir de la réutilisation de PET, un plastique utilisé, en particulier dans la fabrication de bouteilles et d'autres emballages de boissons. Grâce à des procédés industriels, les déchets de PET sont recyclés à 100 %, ce qui entraîne une PET dont l'empreinte carbone (émissions de CO2 dans l'atmosphère) est considérablement réduite. De cette façon, une simple bouteille en plastique devient un matériel difficile avec une multitude d'applications et de fonctionnalités. Nous sommes donc confrontés à un composé d'origine recyclé et, à son tour, recyclable.

PLA (ACIDE POLYLACTIQUE)

PLA (acide polylactique) est fabriqué à partir de ressources naturelles 100% telles que l'amidon de maïs, le manioc ou la canne à sucre, étant dégradable et, dans nos produits, devient 100% compostable à la fin de son cycle de vie, sans la production de déchets toxiques. En outre, sa polyvalence et ses textures différentes permettent l'élaboration de divers articles, des sacs à gourdes, réduisant considérablement l'utilisation de l'énergie au cours de son processus de production.

PAILLE DE BLÉ

La paille de blé est faite à partir de déchets organiques provenant des restes des récoltes de cet céréale. En réduisant sa réutilisation, il contribue à réduire l'utilisation des plastiques d'une manière remarquable, résultant en des composés durables, polyvalents et résistants, qui peuvent être appliqués dans la production d'innombrables produits.

FIBRE DE BAMBOU

La fibre de bambou est obtenue à partir des filaments organiques de cette plante, caractérisés par sa croissance rapide et ses larges connotations écologiques. L'inclusion de fibres de bambou dans divers composés donne lieu à de nouveaux matériaux résistants, tout en devenant une alternative durable aux plastiques traditionnels très polluants.

COTON ORGANIQUE

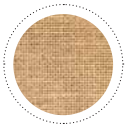
Le coton organique, le coton de nos ancêtres, cultivé en utilisant des méthodes durables avec un faible impact sur l'environnement. La non-utilisation d'insecticides, d'engrais ou d'autres produits chimiques dans le processus de filature et de production se traduit par un tissu confortable, 100% végétal et hypoallergénique, dans un ton naturel qui revendique l'agriculture traditionnelle.

COTON RECYCLABLE

Les résidus de coton des procédés de fabrication, ainsi que ceux des produits qui ont atteint la fin de leur vie utile, prennent une nouvelle vie. Une question se pose : le résultat de la récupération du coton entraîne-t-il un tissu de qualité ? La réponse est OUI, la conservation des ressources naturelles et la réduction de la quantité de déchets générés. En outre, le coton régénéré conserve les propriétés de douceur au toucher.

LIÈGE

Le liège est considéré comme un excellent isolant flexible qui se régénère naturellement autour du tronc des arbres dont il est extrait, principalement à partir de chêne sinisme et de chêne. Les procédés d'extraction du liège ont un impact minimal sur l'environnement, soulignant également qu'il est l'un des matériaux organiques avec plus de durabilité et de résistance.



JUTE NATUREL

Le jute naturel occupe une place de choix parmi les matériaux durables car les procédés utilisés pour sa fabrication représentent un faible impact sur l'environnement, ainsi que sa régénération rapide. L'aspect naturel couplé avec sa force et sa durabilité en font un matériel de référence durable.

BAMBOU

La plante de bambou naturelle se caractérise par sa grande force, sa flexibilité et, surtout, sa croissance et sa régénération rapides, caractéristique qui en fait un matériel durable et une excellente alternative à l'utilisation du bois traditionnel, avec une multitude d'applications. Il est naturellement résistant aux ravageurs, de sorte qu'il n'a pas besoin de pesticides.

PAPIER RECYCLÉ

Les restes de papier des procédés de fabrication, ainsi que le papier qui a atteint la fin de sa vie utile, deviennent une toile écologique et durable. Pendant le processus de recyclage du papier, la quantité de fibres vierges utilisées est considérablement réduite, contribuant ainsi à la conservation des forêts. En outre, la quantité d'énergie utilisée dans le processus de fabrication du papier recyclé est considérablement réduite, par rapport à l'énergie nécessaire à la production de papier blanc traditionnel.

SPECIAL

LASER ENGRAVING MATCHING COLOUR

These notebooks with colour interior have an outer coating specially designed for laser engraving, which will ensure that your advertising or brand is perfectly engraved in the same colour as the inside of your chosen notebook or pen.

Estos bloc de notas con interior en color tiene un recubrimiento exterior especialmente diseñado para grabado láser, con el que conseguirá que su publicidad o marca quede perfectamente grabada en el mismo color que el interior de su bloc o boligrafo elegido.

RPET

The fabric used in the manufacturing process of these items is made of recycled plastic (RPET). Like this, the emission of plastic residues to our planet and the consumption of energy is drastically reduced, resulting in a much more eco-friendly process.

El material de estos productos está fabricado con plástico reciclado (RPET), que, además de ayudar en la disminución de residuos plásticos en el planeta, utiliza menos energía en el proceso de fabricación, haciendo que sea mucho menos dañino para el medio ambiente.

RPET

The fabric used in the manufacturing process of this item is made of recycled plastic (RPET). Like this, the emission of plastic residues to our planet and the consumption of energy is drastically reduced, resulting in a much more eco-friendly process.

El material de este producto está fabricado con plástico reciclado (RPET), que, además de ayudar en la disminución de residuos plásticos en el planeta, utiliza menos energía en el proceso de fabricación, haciendo que sea mucho menos dañino para el medio ambiente.

WRITING

RPET

The fabric used in the manufacturing process of these products is made of recycled plastic (RPET). Like this, the emission of plastic residues to our planet and the consumption of energy is drastically reduced, resulting in a much more eco-friendly process.

El material de estos productos está fabricado con plástico reciclado (RPET), que, además de ayudar en la disminución de residuos plásticos en el planeta, utiliza menos energía en el proceso de fabricación, haciendo que sea mucho menos dañino para el medio ambiente.

RPET

The fabric used in the manufacturing process of these backpacks is made of recycled plastic (RPET). Like this, the emission of plastic residues to our planet and the consumption of energy is drastically reduced, resulting in a much more eco-friendly process.

El material de estas mochilas está fabricado con plástico reciclado (RPET), que, además de ayudar en la disminución de residuos plásticos en el planeta, utiliza menos energía en el proceso de fabricación, haciendo que sea mucho menos dañino para el medio ambiente.

RPET

The fabric used in the manufacturing process of this bag is made of recycled plastic (RPET). Like this, the emission of plastic residues to our planet and the consumption of energy is drastically reduced, resulting in a much more eco-friendly process.

El material de esta bolsa está fabricado con plástico reciclado (RPET), que, además de ayudar en la disminución de residuos plásticos en el planeta, utiliza menos energía en el proceso de fabricación, haciendo que sea mucho menos dañino para el medio ambiente.

ANTIBACTERIAL

Antibacterial material specially processed to inhibit and prevent bacterial growth, due to the incorporation of permanent static microbial agents, which are highly effective in the control against bacterial contamination.

Material antibacteriano, especialmente procesado para inhibir y prevenir las cargas bacterianas, gracias a la incorporación de agentes microbianos permanentes estáticos, con alta efectividad contra la contaminación bacteriana.

RPET

The fabric used in the manufacturing process of these bottles is made of recycled plastic (RPET). Like this, the emission of plastic residues to our planet and the consumption of energy is drastically reduced, resulting in a much more eco-friendly process.

El material de estos bidones está fabricado con plástico reciclado (RPET), que, además de ayudar en la disminución de residuos plásticos en el planeta, utiliza menos energía en el proceso de fabricación, haciendo que sea mucho menos dañino para el medio ambiente.

RPET

The fabric used in the manufacturing process of this product is made of recycled plastic (RPET). Like this, the emission of plastic residues to our planet and the consumption of energy is drastically reduced, resulting in a much more eco-friendly process.

El material de este producto está fabricado con plástico reciclado (RPET), que, además de ayudar en la disminución de residuos plásticos en el planeta, utiliza menos energía en el proceso de fabricación, haciendo que sea mucho menos dañino para el medio ambiente.

RPET

The fabric used in the manufacturing process of these products is made of recycled plastic (RPET). Like this, the emission of plastic residues to our planet and the consumption of energy is drastically reduced, resulting in a much more eco-friendly process.

El material de estos productos está fabricado con plástico reciclado (RPET), que, además de ayudar en la disminución de residuos plásticos en el planeta, utiliza menos energía en el proceso de fabricación, haciendo que sea mucho menos dañino para el medio ambiente.

BAGS

FR Un univers aux multiples combinaisons de formes et de tailles. Des matériaux durables et naturels tels que le coton biologique ou recyclé, le RPET, la jute, le liège ou encore le papier... combinés à des matériaux plus traditionnels tels que le raphia, le non tissé, le tissu... Une collection de sacs avec le **3XR** comme fer de lance : **Réutilisation, Réduction** des émissions et **Recyclage** des matériaux.

EN A universe with infinite combinations of shapes and sizes. Sustainable and natural materials - organic cotton, recycled, RPET, jute, cork, paper...- blend with the more traditional ones - pp-woven, non-woven, fabric...- shaping a collection of bags with the **3XR** as motto: **Reusing, Reduction** of emissions and **Recycling** of materials.

BAGS Objective: zero waste

RPET

The fabric used in the manufacturing process of these bags is made of recycled plastic (RPET). Like this, the emission of plastic residues to our planet and the consumption of energy is drastically reduced, resulting in a much more eco-friendly process.

El material de estas bolsas está fabricado con plástico reciclado (RPET), que, además de ayudar en la disminución de residuos plásticos en el planeta, utiliza menos energía en el proceso de fabricación, haciendo que sea mucho menos dañino para el medio ambiente.

100% COTTON & NATURAL JUTE

NATU-RAL JUTE

Natural jute stands out among sustainable materials because the manufacturing processes have a low impact on the environment, together with its rapid regeneration. The natural aspect, together with its resistance and durability, makes it a sustainable material reference.

El yute natural ocupa un lugar destacado entre los materiales sostenibles, debido a que los procesos empleados para su fabricación suponen un bajo impacto para el medio ambiente, junto a su rápida regeneración. El aspecto natural, unido a su resistencia y durabilidad, lo convierten en un material sostenible de referencia.

NATU-RAL JUTE

Natural jute stands out among sustainable materials because the manufacturing processes have a low impact on the environment, together with its rapid regeneration. The natural aspect, together with its resistance and durability, makes of it a sustainable material reference.

El yute natural ocupa un lugar destacado entre los materiales sostenibles, debido a que los procesos empleados para su fabricación suponen un bajo impacto para el medio ambiente, junto a su rápida regeneración. El aspecto natural, unido a su resistencia y durabilidad, lo convierten en un material sostenible de referencia.

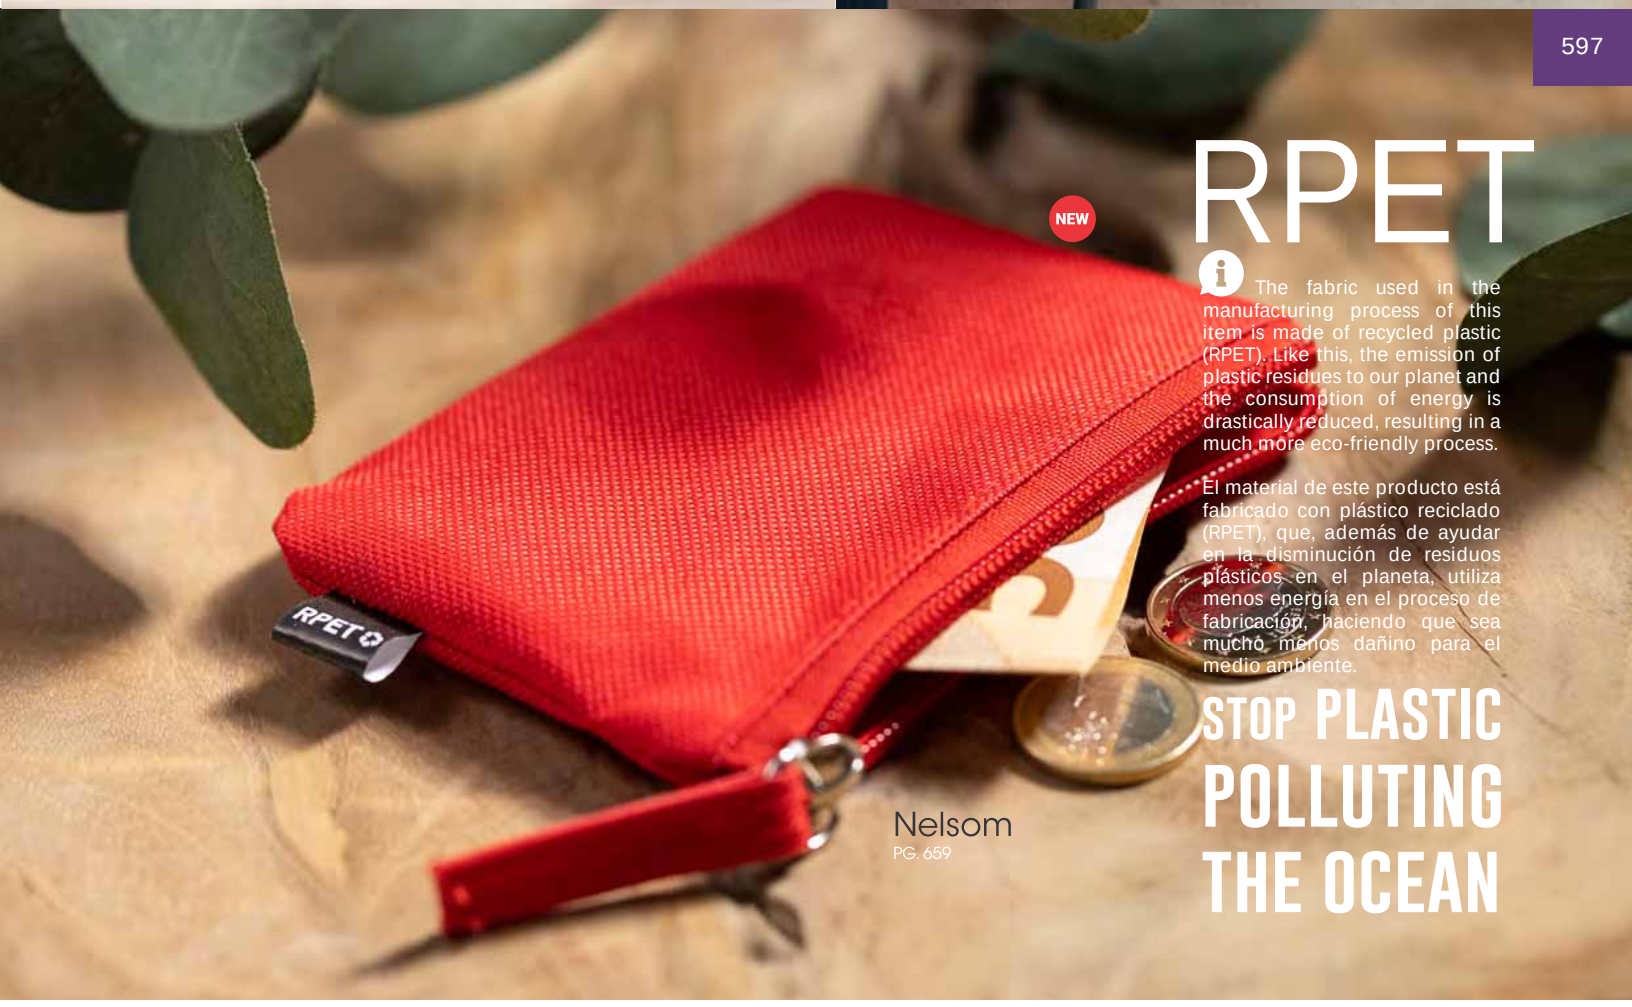
RPET



NEW

The fabric used in the manufacturing process of this item is made of recycled plastic (RPET). Like this, the emission of plastic residues to our planet and the consumption of energy is drastically reduced, resulting in a much more eco-friendly process.

El material de este producto está fabricado con plástico reciclado (RPET), que, además de ayudar en la disminución de residuos plásticos en el planeta, utiliza menos energía en el proceso de fabricación, haciendo que sea mucho menos dañino para el medio ambiente.

Did you know these games improve your skills and enhance brainwork? Learning to overcome challenges sharpens intelligence. Moreover, a positive correlation between these kind of games and the IQ levels of the people who play them regularly has been observed.

¿Sabias que estos juegos mejoran las habilidades de pensamiento y perfeccionan la capacidad de razonamiento?.
Aprender a superar los desafíos agudiza la inteligencia, además se ha demostrado una relación positiva entre los juegos y los niveles de coeficiente intelectual de las personas que se entretienen con ellos de forma regular.

RPET

The fabric used in the manufacturing process of this item is made of recycled plastic (RPET). Like this, the emission of plastic residues to our planet and the consumption of energy is drastically reduced, resulting in a much more eco-friendly process.

El material de este producto está fabricado con plástico reciclado (RPET), que, además de ayudar en la disminución de residuos plásticos en el planeta, utiliza menos energía en el proceso de fabricación, haciendo que sea mucho menos dañino para el medio ambiente.

RPET

The fabric used in the manufacturing process of these products is made of recycled plastic (RPET). Like this, the emission of plastic residues to our planet and the consumption of energy is drastically reduced, resulting in a much more eco-friendly process.

El material de estos productos está fabricado con plástico reciclado (RPET), que, además de ayudar en la disminución de residuos plásticos en el planeta, utiliza menos energía en el proceso de fabricación, haciendo que sea mucho menos dañino para el medio ambiente.

RPET

The fabric used in the manufacturing process of these products is made of recycled plastic (RPET). Like this, the emission of plastic residues to our planet and the consumption of energy is drastically reduced, resulting in a much more eco-friendly process.

El material de estos productos están fabricado con plástico reciclado (RPET), que, además de ayudar en la disminución de residuos plásticos en el planeta, utiliza menos energía en el proceso de fabricación, haciendo que sea mucho menos dañino para el medio ambiente.

ANTIBACTERIAL LINE

Quels sont les additifs antibactériens utilisés dans les produits?

Une source importante d'infections pour l'homme est la contamination bactérienne. Dans certaines conditions environnementales, les bactéries sont capables de proliférer de façon exponentielle en formant de grandes colonies et en produisant des situations d'insalubrité pour les humains.

Pour assurer un environnement hygiénique, il est important de contrôler la prolifération microbienne. C'est pourquoi les produits avec des traitements antibactériens sont de plus en plus demandés, dans des environnements où l'hygiène est particulièrement importante: dans les lieux publics tels que les transports, dans le domaine de l'éducation, ou pour un usage personnel comme objets de tous les jours, sont les domaines où ils commencent à avoir une pertinence croissante.

Les produits avec des traitements antibactériens sont capables de réduire considérablement les charges bactériennes présentes sur les surfaces des matériaux, grâce à l'incorporation d'agents microbiens statiques permanents, avec une grande efficacité pour inhiber et prévenir la contamination bactérienne.

Les normes ISO 22196 et ISO 20743 déterminent l'activité antibactérienne dans les matières plastiques et les surfaces non poreuses et les produits textiles, respectivement. Ces analyses permettent de connaître l'efficacité de l'inhibition microbienne que les additifs ont sur les objets traités par une évaluation quantitative.

RPET

The fabric used in the manufacturing process of these products is made of recycled plastic (RPET). Like this, the emission of plastic residues to our planet and the consumption of energy is drastically reduced, resulting in a much more eco-friendly process.

El material de estos productos está fabricado con plástico reciclado (RPET), que, además de ayudar en la disminución de residuos plásticos en el planeta, utiliza menos energía en el proceso de fabricación, haciendo que sea mucho menos dañino para el medio ambiente.

skill game

wooden

Did you know these games improve your skills and enhance brainwork? Learning to overcome challenges sharpens intelligence. Moreover, a positive correlation between these kind of games and the IQ levels of the people who play them regularly has been observed.

¿Sabias que estos juegos mejoran las habilidades de pensamiento y perfeccionan la capacidad de razonamiento?.
Aprender a superar los desafíos agudiza la inteligencia, además se ha demostrado una relación positiva entre los juegos y los niveles de coeficiente intelectual de las personas que se entretienen con ellos de forma regular.

RPET

The fabric used in the manufacturing process of this product is made of recycled plastic (RPET). Like this, the emission of plastic residues to our planet and the consumption of energy is drastically reduced, resulting in a much more eco-friendly process.

El material de este producto está fabricado con plástico reciclado (RPET), que, además de ayudar en la disminución de residuos plásticos en el planeta, utiliza menos energía en el proceso de fabricación, haciendo que sea mucho menos dañino para el medio ambiente.

RPET
The fabric used in the manufacturing process of this jacket is made of recycled plastic (RPET). Like this, the emission of plastic residues to our planet and the consumption of energy is drastically reduced, resulting in a much more eco-friendly process.
El material de esta chaqueta está fabricado con plástico reciclado (RPET), que, además de ayudar en la disminución de residuos plásticos en el planeta, utiliza menos energía en el proceso de fabricación, haciendo que sea mucho menos dañino para el medio ambiente.

NEW

RPET

The fabric used in the manufacturing process of this polo shirt is made of recycled plastic (RPET). Like this, the emission of plastic residues to our planet and the consumption of energy is drastically reduced, resulting in a much more eco-friendly process.

El material de este polo está fabricado con plástico reciclado (RPET), que, además de ayudar en la disminución de residuos plásticos en el planeta, utiliza menos energía en el proceso de fabricación, haciendo que sea mucho menos dañino para el medio ambiente.

RAIN & COLD

RPET

The fabric used in the manufacturing process of these products is made of recycled plastic (RPET). Like this, the emission of plastic residues to our planet and the consumption of energy is drastically reduced, resulting in a much more eco-friendly process.

El material de estos productos está fabricado con plástico reciclado (RPET), que, además de ayudar en la disminución de residuos plásticos en el planeta, utiliza menos energía en el proceso de fabricación, haciendo que sea mucho menos dañino para el medio ambiente.

ANTIBACTERIAL items

Antibacterial material specially processed to inhibit and prevent bacterial growth, due to the incorporation of permanent static microbial agents, which are highly effective in the control against bacterial contamination.

Material antibacteriano, especialmente procesado para inhibir y prevenir las cargas bacterianas, gracias a la incorporación de agentes microbianos permanentes estáticos, con alta efectividad contra la contaminación bacteriana.
